AN AMERICA FIRST ENERGY PLAN

I'm delighted to be in North Dakota, a state at the forefront of a new energy revolution.

Oil and natural gas production is up significantly in the last decade. Our oil imports have been cut in half.

But all this occurred in spite of massive new bureaucratic and political barriers.

President Obama has done everything he can to get in the way of American energy. He's made life much more difficult for North Dakota, as costly regulation makes it harder and harder to turn a profit.

If Hillary Clinton is in charge, things will get much worse. She will shut down energy production across this country.

Millions of jobs, and trillions of dollars of wealth, will be destroyed as a result.

That is why our choice this November is so crucial.

Here's what it comes down to.

Wealth versus poverty.

North Dakota shows how energy exploration creates shared prosperity. Better schools. More funding for infrastructure. Higher wages. Lower unemployment.

Things we've been missing.

It's a choice between sharing in this great energy wealth, or sharing in the poverty promised by Hillary Clinton.

You don't have to take my word for it. Just listen to Hillary Clinton's own words. She has declared war on the American worker.

Here is what Hillary Clinton said earlier this year: "We are going to put a lot of coal miners and coal companies out of work."

She wants to shut down the coal mines.

And if Crooked Hillary can shut down the mines, she can shut down your business too.

Let me tell you how President Obama Undermined Our Middle Class

President Obama's stated intent is to eliminate oil and natural gas production in America.

His policy is death by a thousand cuts through an onslaught of regulations.

The Environmental Protection Agency's use of totalitarian tactics forces energy operators in North Dakota into paying unprecedented multi-billion dollar fines before a penalty is even confirmed.

Government misconduct goes on and on:

- The Department of Justice filed a lawsuit against seven North Dakota oil companies for the deaths of 28 birds while the Administration fast-tracked wind projects that kill more than 1 million birds a year.
- The U.S Fish and Wildlife Service abuses the Endangered Species Act to restrict oil and gas exploration.
- Adding to the pain, President Obama now proposes a \$10-per-barrel tax on American-produced oil in the middle of a downturn.

At the same time President Obama lifts economic sanctions on Iran, he imposes economic sanctions on America. He has allowed this country to hit the lowest oil rig count since 1999, producing thousands of layoffs.

America's incredible energy potential remains untapped. It is a totally self-inflicted wound.

Under my presidency, we will accomplish complete American energy independence.

Imagine a world in which our foes, and the oil cartels, can no longer use energy as a weapon.

But President Obama has done everything he can to keep us dependent on others. Let me list some of the good energy projects he killed.

He rejected the Keystone XL Pipeline despite the fact that:

- It would create and support more than 42,000 jobs.
- His own State Department concluded that it would be the safest pipeline ever built in the United States.
- And it would have no significant impact on the environment.
- Yet, even as he rejected this America-Canada pipeline, he made a deal that allows Iran to transport more oil through its pipeline that would have ever flowed through Keystone -with no environmental review.

President Obama has done everything he can to kill the coal industry. Here are a few of President Obama's decrees:

Regulations that shut down hundreds of coal-fired power plants and block the construction of new ones.

A prohibition against coal production on federal land.

Draconian climate rules that, unless stopped, would effectively bypass Congress to impose job-killing cap-and-trade.

President Obama has aggressively blocked the production of oil & natural gas:

- He's taken a huge percentage of the Alaska National Petroleum Reserve off the table
- Oil and natural gas production on federal lands is down 10%.
- 87% of available land in the Outer Continental Shelf has been put off limits.
- Atlantic Lease sales were closed down too - despite the fact that they would create 280,000 jobs and \$23.5 billion in economic activity.
- President Obama entered the United States into the Paris Climate Accords - unilaterally, and without the permission of Congress. This agreement gives foreign bureaucrats control over how much energy we use right here in America.

These actions have denied millions of Americans access to the energy wealth sitting under our feet.

This is your treasure, and you - the American People - are entitled to share in the riches.

President Obama's anti-energy orders have also weakened our security, by keeping us reliant on foreign sources of energy.
